

1. NovoDS Studio Overview

NovoDS Studio is a suite of software applications that allows the user to handle every step of the digital signage process for displays with a supported Novo device, from content creation all the way to content deployment. NovoDS Studio consists of the following applications:

- **DS Playlists:** Allows you to create and edit the multimedia content you want to show on your display.
- **DS Schedules:** Allows you to plan and schedule the playback of the content created in DS Playlists.
- **DS Devices:** Allows you to remotely manage and control all your displays with Novo devices.

Each application can be accessed by selecting their respective tab on the right side of the NovoDS Studio interface.
