

2.1 Hardware Installation

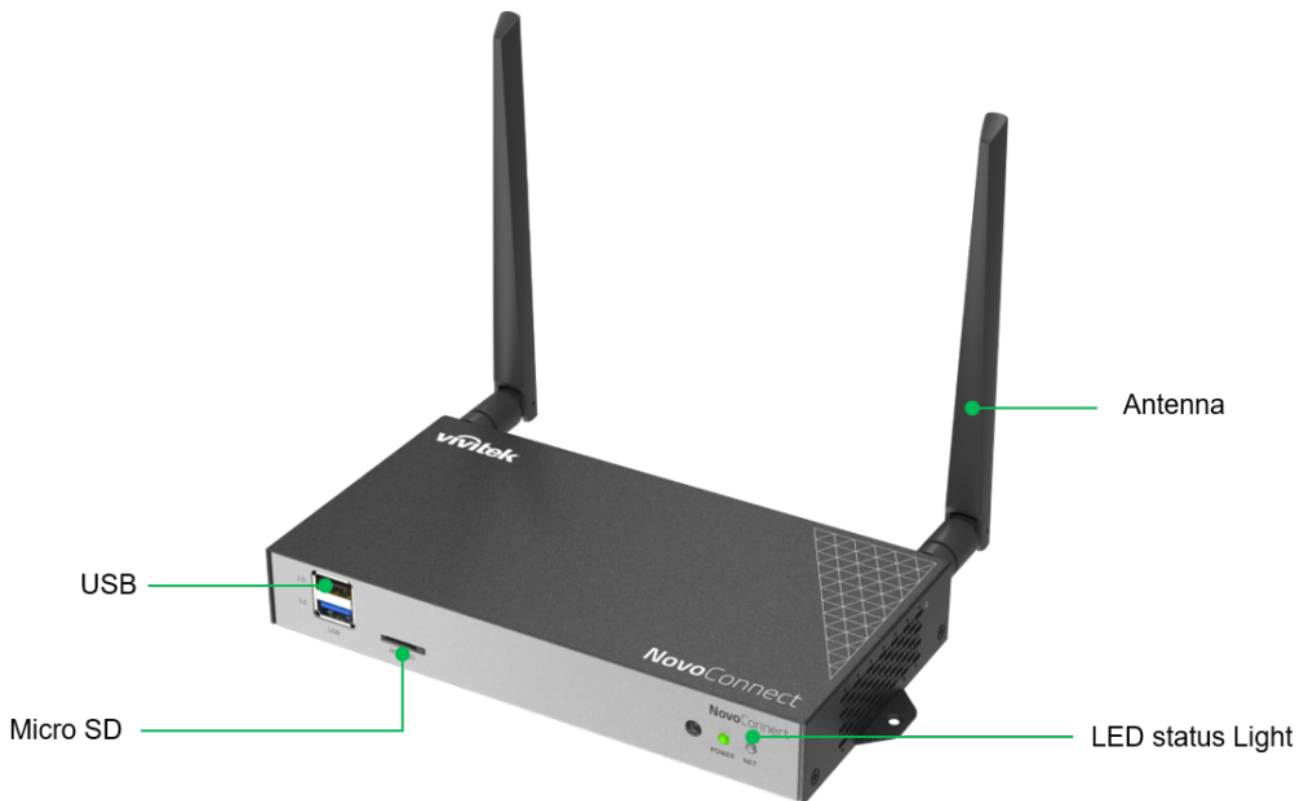

Installing X700 or X900 is very simple and straight-forward. The following two figures summarize the key peripheral ports available. (You may refer to the Quick Start Guide for details.)

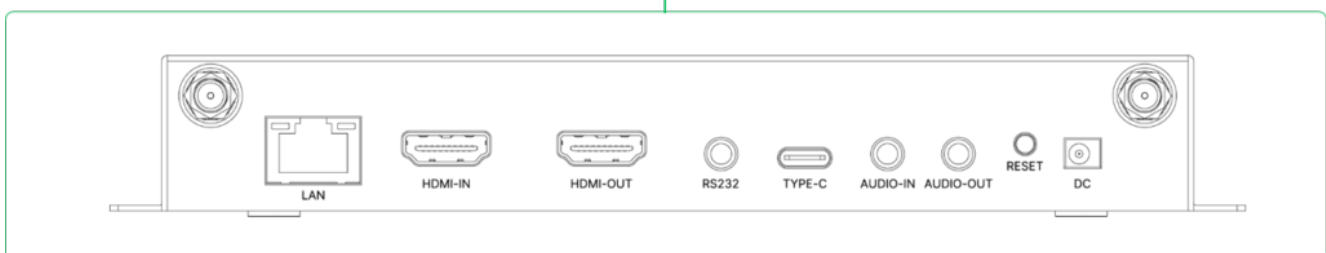

X700 Key Peripheral Ports

X900 Key Peripheral Ports

NC-X710 & NC-X910 I/O Ports in front side

NC-X710 & NC-X910 back I/O ports in back side

Typically, users just need to attach the following four ports

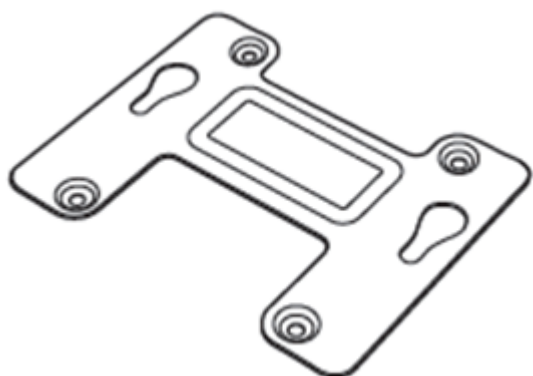

1. Attach the WiFi antenna
2. Connect the HDMI cable
3. Plug in the Ethernet port
4. Apply the DC power with the AC-DC adaptor provided

The AC-DC power adaptor comes with several types of plugs, one of which should be suitable to the power outlets used in your country or region.

AC-DC Adaptor with Changeable Plug

In addition, a simple mounting kit is also available in the package, with which you could mount the X700/X900 main unit in your settings, like on the wall, beneath a conference table, etc.
