

2.6.5.1 The Content Menu

When you click on an item/box in the **Layout** window of the editing panel, the content menu will appear to the right. The content menu allows you to select the type of content that will appear in each item/box on a page and then configure the content itself.

To select the type of content that will appear in an item/box on the page, click one of the options in the bar to the left of menu. The type of content available include:

Button	Item	Description
--------	------	-------------

	<p>Import</p>	<p>[For Grid Mode Only] Allows you to import content from an item/box in another playlist's page. Go to <i>Importing Content (Grid Mode Only)</i> for more details on importing content.</p>
	<p>Media</p>	<p>Makes the layout item/box display an image, video, document, or music file(s) that is either stored locally, remotely (via cloud storage), or on a removable storage device. <i>NOTE: Supported file formats include PNG, JPG, JPEG, BMP, MP4, WMV, 3GP, AVI, MOV, PPT, PPTX, PDF, and MP3.</i> Go to <i>Media</i> for more details on configuring the file settings.</p>
