

2.7.1 Media

To display a media file in a layout item/box click the media button () in the bar to the left of the content menu, and the media menu will appear.

The media menu features three sub-menus which can be accessed at the top of the menu:

- **Local Media** – Allows you to upload media files from your local storage.

- **Remote Media** – Allows you to upload media files from remote cloud-based storage (e.g. DropBox, OneDrive, etc.).
- **Removable Storage** – Allows you to upload media files stored on a removable storage device (e.g. USB flash drive)

Each submenu features different configuration options. Follow the instructions below to configure the display settings for each type of media file.
