

2.7.10 Remote Text

The screenshot shows a dialog box titled "Remote Properties". At the top, there is a "File Protocol:" section with radio buttons for FTP (selected), Samba, DropBox, OneDrive, Google Drive, and URL. Below this is an "Account" section with a green question mark icon. It contains a "Port:" spinner set to 21, a "Path:" text field with the value "ftp://127.0.0.1/abc.txt , 127.0.0.1/share/abc.txt", a "User Name:" text field, and a "Password:" text field. At the bottom left, there is a "Refresh Period:" spinner set to 15, followed by the word "Minutes". At the bottom right, there are three buttons: "Save", "Cancel", and "Go Back".

In the **Remote Properties** section, enter the login settings for the storage service where the text file is located, and then in the **Refresh Period** field select how often you want DS Playlist to check for new files stored in the path given.

Once you have finished configuring all the account settings, click **Save** to finish.
