

3.6 Wallpaper Management

Remote Manager Cloud allows to upload image to the wallpaper library and deploy to selected devices.

Here are the instructions to show you how to do:

Step1. On the Menu left side, Click Devices

Step2. Click the icon menu on the right top corner.

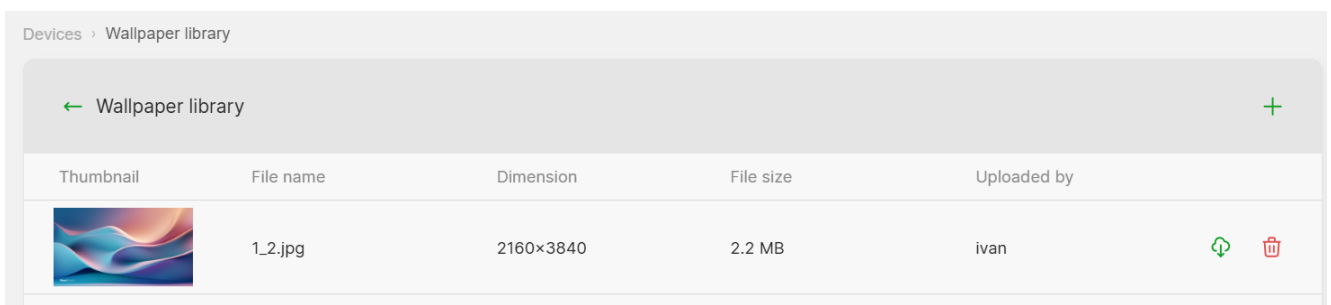

Step3. Click the option Wallpaper Library

Step4. Click + to add wallpaper file to the library

Step5. Image files will be listed in the library after they are uploaded.

Step6. Click the deploy icon, and Deploy window will pop up on

the top of the screen.

← Wallpaper library					+
Thumbnail	File name	Dimension	File size	Uploaded by	
	1_2.jpg	2160×3840	2.2 MB	ivan	

Step7. Check the selected devices and click deploy.

Deploy wallpaper

Thumbnail	File name	File size
	1_2.jpg	2.2 MB

Choose devices or device groups

Devices

Device groups

	Device name	Description
<input checked="" type="checkbox"/>	 RK#2B-NT1	New Device
<input type="checkbox"/>	 RK#2B-NT2	New Device

Deploy

Step8. Back to the device list and Click the device control icon.

Status	Name	Device ID	Model	Group	
Active	RK#2B-NT1	59Q-WT3	BK2	RK2F	
Active	RK#2B-NT2	S0W-I7T	BK2	RK2F	

Step9. The uploaded image is listed in the tab wallpaper.
Click the preferred image to deploy to the selected device.
