

4.1 Overview

Upon selecting the DS Devices tab, you will enter its main page, which is grouped by 8 sections.

Section	Item	Description
1	List Filter	Filters the devices in the device list based on the following categories: <ul style="list-style-type: none">■ All Devices – Lists all the devices in Device List (Section 8)■ Unassigned Devices – Lists the devices not assigned to any group(s)
2	Add Devices	Add NovoDS devices via 3 ways, manually entering device info, auto-discovering devices in the network, and importing from a device list. Export current NovoDS devices to a device list (for future import)

3	Generate Configuration File	Create a device configuration file for deployment of NovoDS devices
4	Remote Snapshot	Display real-time screenshot of NovoDS devices. Its update frequency ranges from every 2 seconds to every 2 minutes.
5	Announcements	Allows you to create and publish impromptu messages on NovoDS devices
6	Add Group	Creates a device group, enabling you to organize devices for easier management
7	Group List	Lists the existing device groups
8	Device List	<p>Lists NovoDS devices and the relevant status info and control buttons.</p> <ul style="list-style-type: none"> ■ A green indicator means the device is online. ■ A red indicator means the device is offline. ■ A context menu is shown at the top-right corner. Depending on whether you are in a device group or not, it shows group or device control functions.
