

4.3.1 Start and Stop Playback

Once a device is connected, it can play any playlists available on the device.

1. Select the desired playlist in column "Playlist"
2. Click on the "Play" button to start the playback
3. Once the playback is started, you can click on the "Stop" button to stop the playback anytime.

The screenshot displays a web-based interface for managing devices. On the left, a sidebar shows a hierarchy of devices: 'All Devices (123)' and 'Unassigned Devices (114)'. Below this is a 'Group List' with two groups: '9F (4)' (highlighted in blue) and '2B Showroom (5)'. The main area features a toolbar with buttons for '+ Devices', 'Generate Configuration File', 'Remote Snapshot', and 'Announcements'. Below the toolbar is a 'Playlist' section with 'Change', 'Upload Schedule', and 'Functions' buttons. The central part of the interface is a table with columns: Label, Name, IP Address, Playlist, Action, and Status. The table contains four rows of device data. The first row, 'Meeting Room 3', is highlighted and shows a green status icon and the text 'Playing Demo_watchhand playlist'. The 'Action' column for this row has a green box around the play button icon. The other three rows have red status icons and are not playing.

Label	Name	IP Address	Playlist	Action	Status
Meeting Room 3	Novo-27DF1	192.168.86.113	Demo_watchhand		Playing Demo_watchhand playlist .
Reception area	<unknown>	10.136.5.53	EU COVID19 StaySafe		
Hallway	<unknown>	172.16.5.144			
Boardroom	DS-88DF6	10.136.5.138
