

Are there any limitations about the playlist widgets, like Media, Webpage, Twitter, etc.?

1. No limit on how many Twitter widgets are used in one page.
2. "Instagram" widgets in any given playlist must share the same Instagram account.
3. "Facebook" widgets in any given playlist must share the same Facebook account.
4. Only one of "USB Camera", "HDMI IN widgets can exist in any given page
5. "Video Decoding" is the max amount of video widgets that can exist in one page. (Video widgets include "YouTube", "IP Streaming", "Social Media (play video)" and "Media" (with video clips).

Note: No more than one YouTube widget can exist in one page.

6. The following table is a good summary of other information.

	Media (Media Formats)	Media (Max File Size)	Video Decoding	Web Page (Max File Size for Offline Content)	Text – Local Text (Max Length)	HDMI-In
--	--------------------------	--------------------------------	-------------------	--	---	---------

NovoDS Mini	Pictures: png, jpg, jpeg, bmp Video: mp4, wmv, 3gp, avi, mov Audio: mp3 Others: pdf, ppt, pptx	2GB	Single 1080@30fps	1GB	512	N/A
NovoDS		2GB	Single 4K@30fps	1GB	512	N/A
