4.1.1 Sleep Timer

Configuring a Boot up and Shut down Timer

The NovoTouch BK3 has a built-in Google EDLA qualified operating system; therefore, the timer setting needs to be set through the Android setting.

Step1. In the Main page, tap Settings.

Settings

Step2. In the Settings menu, select Advanced Features.

Settings

Step3. The Sleep Timer menu will show the following options:

- Do not enter sleep mode
- Enter sleep mode after idle timeout

This item includes the following options to select: **5 minutes** / **10 minutes** / **15 minutes** / **30 minutes** / **1 hour**

I. After you've selected the option you want, tap Apply.

II. Return to the display's home screen.

III. Once the home screen has been idle for the designated amount of time, the display will enter sleep mode.

< Display			
Sleep Timer	Power & Sleep		
Auto Reboot	O Never enter sleep mode		
Direct Power On	 Enter sleep mode after idle-timeout Set power-on schedule 		5 minutes 5 minutes 10 minutes
Low Blue Light			15 minutes 30 minutes 1 hour
Apply		Cancel	

Timer selection

• Set power-on schedule

Allows you to set the days and time period each week when the display will be constantly on.

- i. After you've selected the days and time period you want, tap Apply.
- ii. Return to the display's home screen.
- iii. Once the designated time is past, the display will enter sleep mode.
