1.2 Product Features

NovoDisplay comes with powerful digital signage and collaboration features.

(1) Digital Signage

NovoDS, a full-fledged signage application, is built in for you to create impressive visual content without any programming skill, and at the same time, with the ease of managing the content playback.

NovoDS Cloud (via https://www.NovoDS.com) provides another layer of flexibility for you to manage these devices anywhere, anytime.

(2) Collaboration

With a powerful CPU and high-speed WiFi/Ethernet connectivity, NovoDisplay propels the NovoConnect solution to the next level.

- High-clarity 4K-resolution mirroring
- Native mirroring (AirPlay, Google Cast): Software installation is not needed.
- Smooth and low-latency screen mirroring
- Built-in collaboration tools, including content sharing, control, screen annotation, etc.
- OS supported: Windows | MacOS | Linux | iOS | Android | Chromebook
- BYOM feature can be enabled by adding our Android OPS module (VKA-G1)

(3) Device Management

- Remote Manager: Our centralized management software support NovoDisplay devices.
- Firmware Update: This can be done via “online update” over the Internet, or, “on-premises update” through

local network using Remote Manager.

All these features are available without any on-going subscriptions.
