Creating a Playlist

Creating playlists is quite straightforward.

1. Select device model
2. Select screen orientation
3. Select layout preference
   - Selecting 'Designer Templates' provides you with a collection of expertly crafted, ready-to-use templates that streamline your design process and save you time.
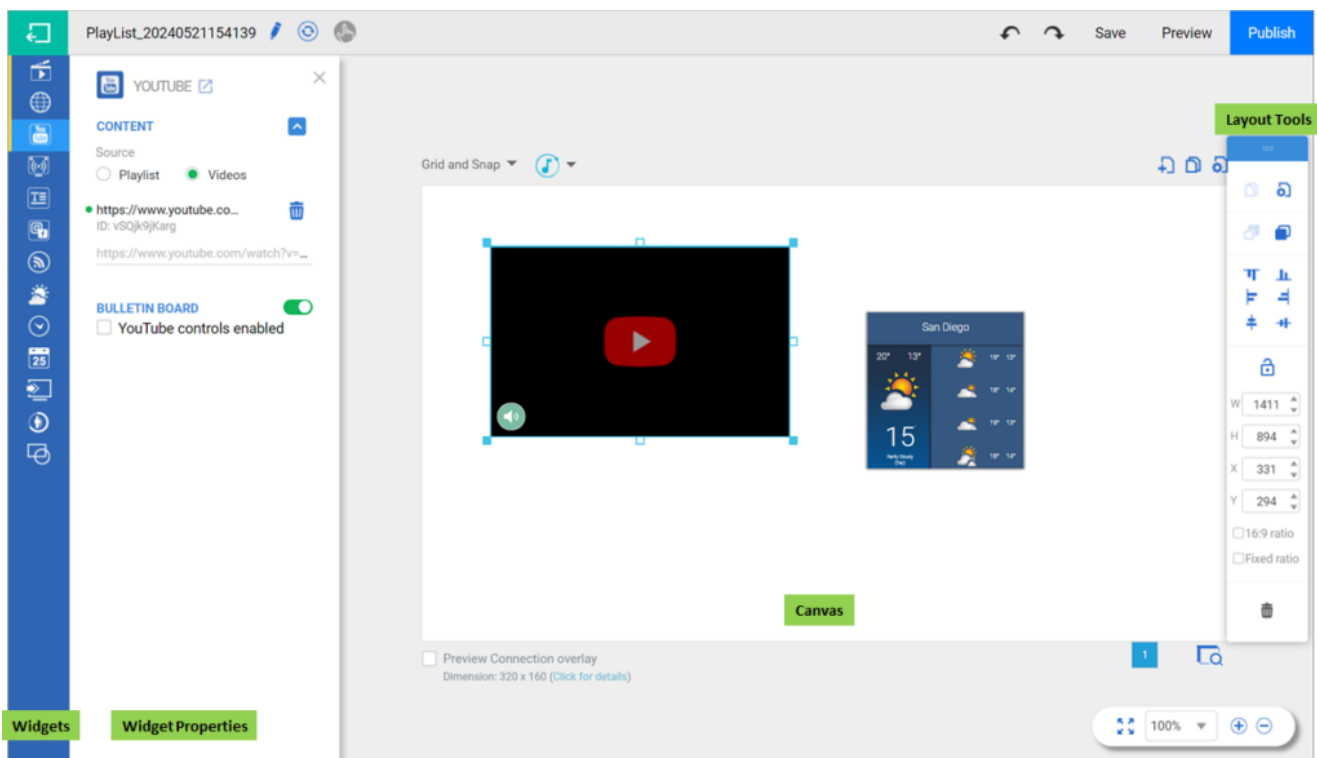

4. Then, start editing.

The playlist editor features a user-friendly WYSIWYG interface, allowing you to create and edit playlists with ease, exactly as they will appear in the final presentation.

There are four main regions

- The left-most column is all the content **Widgets** NovoDS

Cloud supports.

- **Widget Properties** is the place for users to edit each widget, such as defining content source, adjusting font size, etc.
- **Canvas** is the area for users to place the content widgets
- **Layout Tools** allow users to manipulate layering, alignment, and dimension, etc.

Once you finish building the playlist, you could do the followings

- **Save** the playlist to the Cloud
- **Preview** the playlist on your computer
- **Publish** the playlist to NovoDS devices
