# 3.11 On-Screen Annotation & Touch Back

When your PC or laptop screen is mirrored to the NovoTouch, your screen will be displayed in a **floating window**.

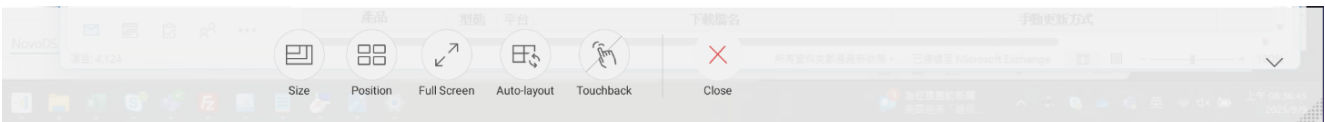

There two key features enabled when started mirroring. One is **'Annotation'** and the other one is **'Control panel'**.

Control Panel

Tap the icon with an arrow shown on the bottom right corner to expand the functional toolbar

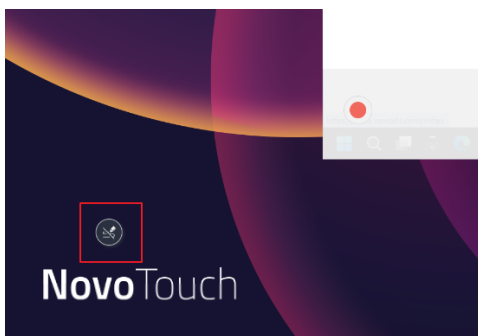

The tool bar provides five additional features.

The following table has the description of each tool icon.

| Icon	Functions	Description
	Size	Change projected screen size, from small/medium/large
	Position	Display your screen in the desired position
	Full Screen	Display your screen from normal to full screen or from full screen back to normal
	Auto-Layout	Automatically lay out projected screen
	Touchback	This function allows you to control the projected PC/laptop
	Close	Withdraw projection

On-Screen Annotation:
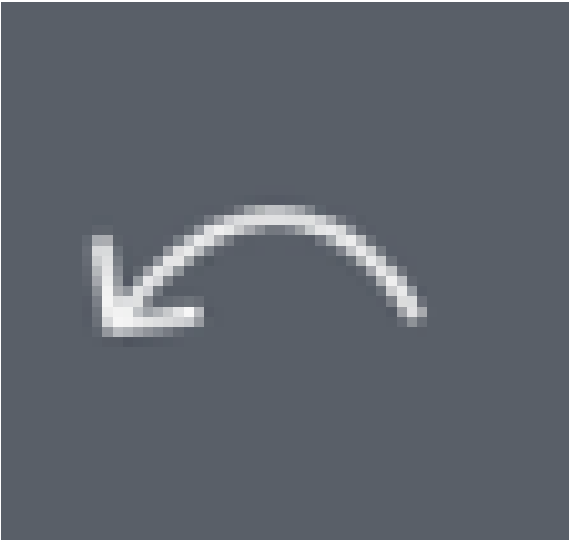

The **Annotation** icon is displayed on the bottom of left corner, and default setting as a minimized icon.

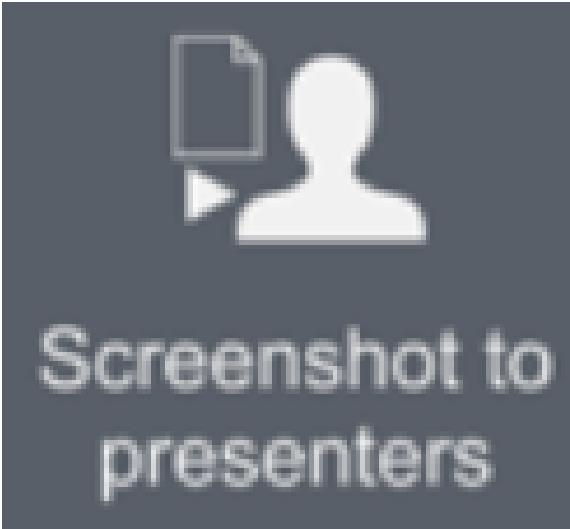

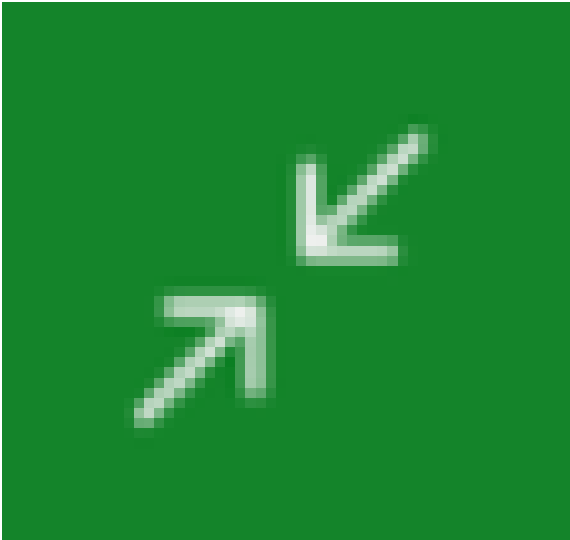

Tap the icon to expand the tool palette. There are eight features in the feature wheel.

The following table has the description of each tool icon.

Icon	Functions	Description
	Pen & Highlighter	1) Click to enable this tool 2) Long-press to select pen/highlighter, color, & size
	Eraser	Click to enable Eraser
	Disable Annotation	Disable on-screen annotation
	Redo	Re-do

Icon	Functions	Description
	Undo	Un-do
	Delete	Delete all on-screen annotation
	Snapshot to all participants	Send screen snapshot to all meeting participants (connected users)

Icon	Functions	Description
	Snapshot to presenters	Send screen snapshot to presenters
	Collapse	Click to collapse the menu palette
