

How to collect device logs – NovoDS Studio

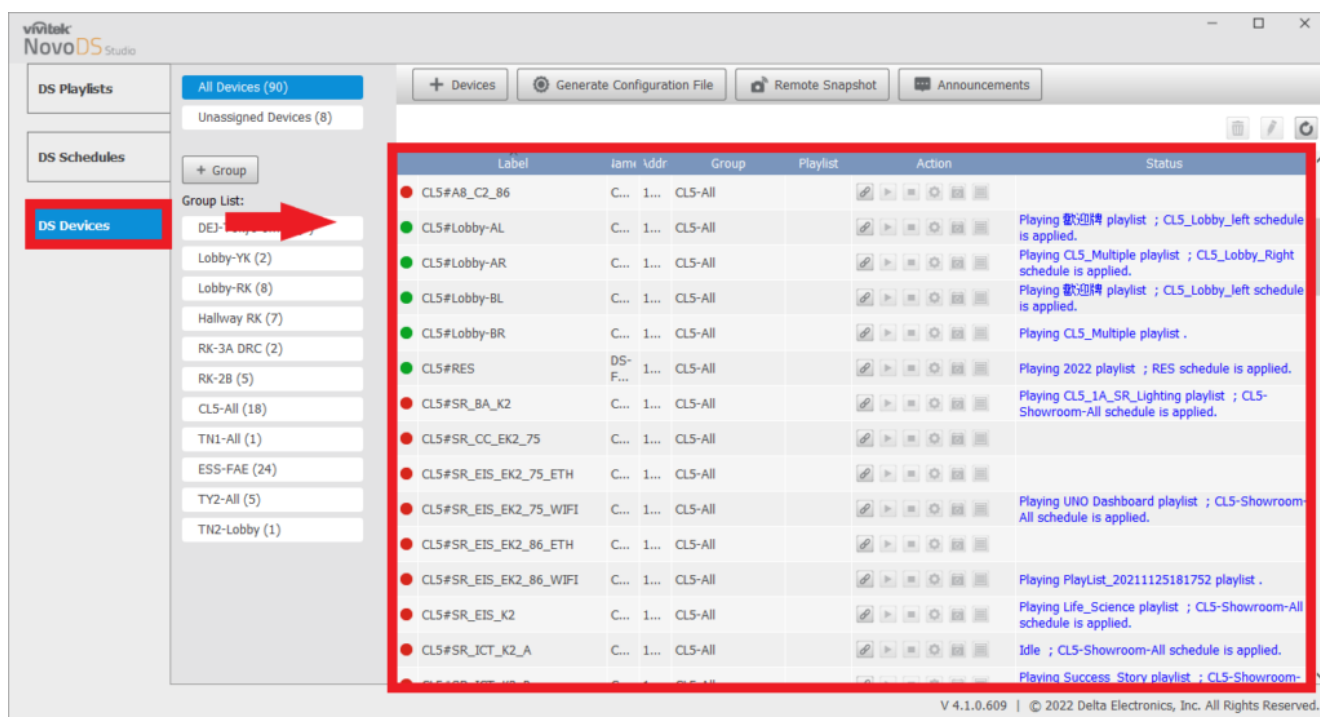

This article is applicable for NovoDS Studio.

Get software

[Go to NovoDS.com > Resource > Software](https://www.novods.com/resource/software)

Connecting to a device

Run **NovoDS Studio** and switch to **Device Management** page.

Select the device and click on **Connect** to connect the device and perform more operating.

There're two kind of **Device Logs**

- **App Log** – It contains NovoDS App's process since it is running. Usually uses for software debug.
- **System Log** – It contains the most processes of Novo device since it is starting up. Usually uses for software and hardware debug.
