

How to schedule panel on/off (sleep timer)

Model name: NovoDisplay DK430, DK550, DK650, DK750

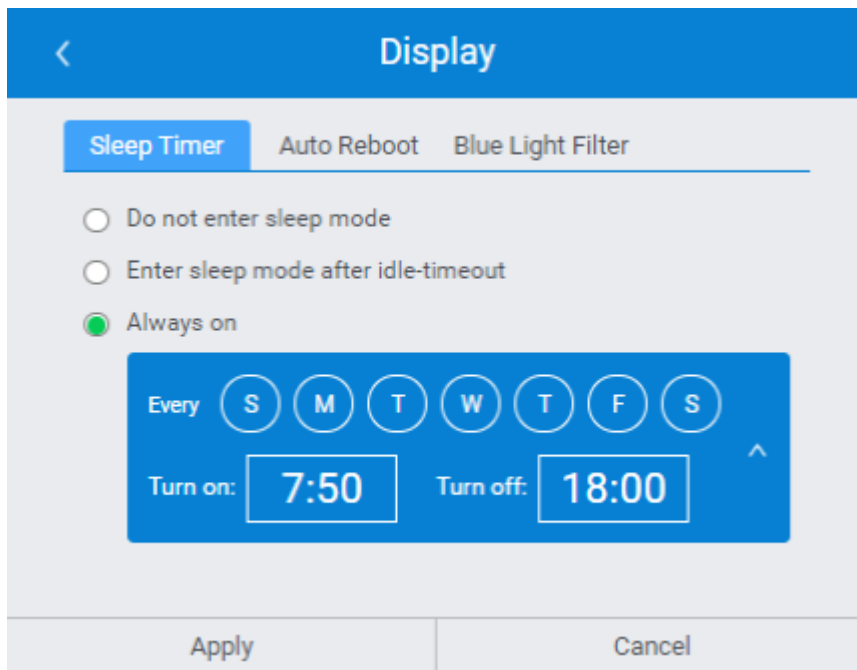

Firmware version: V4.2.0

Step1. Use a use mouse to connect with NovoDisplay.

Step2. Go to **Presentation > Settings > Display > Sleep Timer**

Sleep timer is disable by default.

User can schedule panel ON/OFF by weekly.

The screenshot shows the 'Display' settings menu with the 'Sleep Timer' tab selected. There are three radio button options: 'Do not enter sleep mode', 'Enter sleep mode after idle-timeout', and 'Always on' (which is selected). Below these options is a blue box containing a weekly schedule selector with circles for S, M, T, W, T, F, S. The 'Turn on' time is set to 7:50 and the 'Turn off' time is set to 18:00. At the bottom of the screen are 'Apply' and 'Cancel' buttons.

In this case, the NovoDisplay turns on panel from 7:50AM to 6:00PM everyday.

If user want to turn ON/OFF panel remotely via network. Please go to this [article](#).
