NovoTouch BK-2 Release Notes

V6.0.6

2024/11/15

New Features

- Support for Slovak and Swedish languages.
- Support for single system/dual system switching.
- **[Whiteboard]** Added text input functionality.
- **[Whiteboard]** Tools added Protractor, Ruler, and Compass.
- **[Whiteboard]** Menu added a Settings page with 'Auto-hide toolbar' default Disabled; when enabled, the toolbar will automatically hide after one minute of inactivity, and tapping the screen will display the toolbar.

Enhancements & Changes

- **[Whiteboard]** Maximum of 4 images can be inserted per page.

Bug Fixes

- **[Whiteboard]** Fixed issue with saving to external USB where no prompt appears when 'Save' or 'Export' is clicked without selecting the folder.
- **[Whiteboard]** Fixed the issue where saving to USB was not working when using the "Multi-Canvas" feature.
- **[Whiteboard]** Fixed the issue where the eraser did not properly clear drawing strokes.
- **[Whiteboard]** Fixed the issue where drawing strokes did not appear immediately when using the pen, but only after stopping.
- **[Whiteboard]** Fixed the default value error for the eraser/pen tools.
- Fixed the issue where HDMI CEC was shown as "Disabled"

on BKxx2i Series after upgrading from an older version, but was actually enabled.
- Fixed the issue where manually switching between "Soft" and "Bright" modes in picture settings resulted in errors.

V6.0.5

2024/9/3

New Features

- Support NT Announcement.
- In NT Settings, add HDMI Out configuration to the Display page.

Enhancements & Changes

- **[Whiteboard App]** Optimize the insertion of shape objects, including drawing tools and eraser functions.
- **[Whiteboard App]** Added language Slovak.

Bug Fixes

- Fixed the issue with Whiteboard's inability to save files to USB.
- Fixed the issue where moving video files inserted from USB into Whiteboard results in their deletion.
- Fixed the issue where moving PDF files inserted from USB into Whiteboard results in their deletion.

V6.0.4

2024/7/26

Notes

- Use the following software versions (or above) to have the best user experience.

- Remote Manager with version V3.3.5 or above.
- NovoConnect Software and Wi-Fi Launcher with version V4.5.8 or above.
- Android NovoConnect App with version V4.5.6 or above.
- iOS NovoConnect App with version V4.5.5 or above.

New Features

- Users can configure Startup Channel (video source) and show/hide of Sidebar and Launch-Pad:
  - Startup channel can be set to one of Android, HDMI1, HDMI2, HDMI3, OPS, FRONT_HDMI, and Type-C. Default channel is Android.

Enhancements & Changes

- **[Whiteboard App]** Optimize the performance of PDF, Images, and Shapes objects.
- **[NovoDS]** Updated to latest version 4.5.1, with some of key changes listed below
  - Fixed issue where Remote Snapshot and device are out of sync.
  - Fixed Remote Media & Remote Text issues (when using Google Drive)
  - Fixed issue where sending Singlewire Announcements to BKxx2i Series via DS Cloud failed to play Message Templates when NovoDS is in the background.
  - Singlewire is supported.
- **[System Performance]** Improved system responsiveness after opening several Apps.

Bug Fixes

- Fixed YouTube App playback issue. (When playing 4K video in YouTube App, using 2160p or 1440p resolution led to visual defects.)
- Fixed issue where the system volume was always reset to

the default value upon opening NT Player.
