NovoTouch EK-5 Release Notes

V8.0.1

New Features

1. Added a remote control key combination to support “Turn On/Off” screen touch functionality:
2. Turn On Screen Touch: Source, Source, Volume +
3. Turn Off Screen Touch: Source, Source, Volume –
4. Added new Audio Output Modes:
    1. All
    2. Speaker
    3. SPDIF output
    4. ARC
    5. USB OUT

Enhancements & Changes

5. Updated the text for the OPS shutdown prompt.
6. Optimized external signal sources to support automatic signal switching.
7. Optimized the File Manager: clicking outside the window now closes it directly.
8. PIP (Picture-in-Picture) default window modified to “medium.”
9. When Hotspot mode is enabled, the SSID now displays as NVC.
10. [Whiteboard] Menu added the Collaborative tool and hid the underline icon on the bottom Navigation bar.

Fixed Bugs

11. Fixed an issue where USB data could not be read after power-cycling the device if a USB was inserted first.
12. Fixed a spelling error in the PIP window’s “small” text (likely a localization/pinyin error).
13. Fixed abnormal recording with an external microphone in NT

Minutes.

14. Fixed an issue where the device randomly restarted when opening NT PIP.
15. Fixed an issue where the front panel buttons randomly became unresponsive.
16. Fixed the light sensing issue.
17. Fixed an issue where the Screen Broadcast Settings page displayed a blue background and incorrect buttons.
18. Fixed an issue where the Wake up On Lan function was ineffective.
19. Fixed an issue where Open & Save displayed a blank page after linking Google Drive.
20. Fixed an issue where the Google SIGN-IN API was ineffective, preventing linkage with Drive & Dropbox.
