# Screen Extension

NovoConnect App support screen extension feature for Windows and macOS user(s).
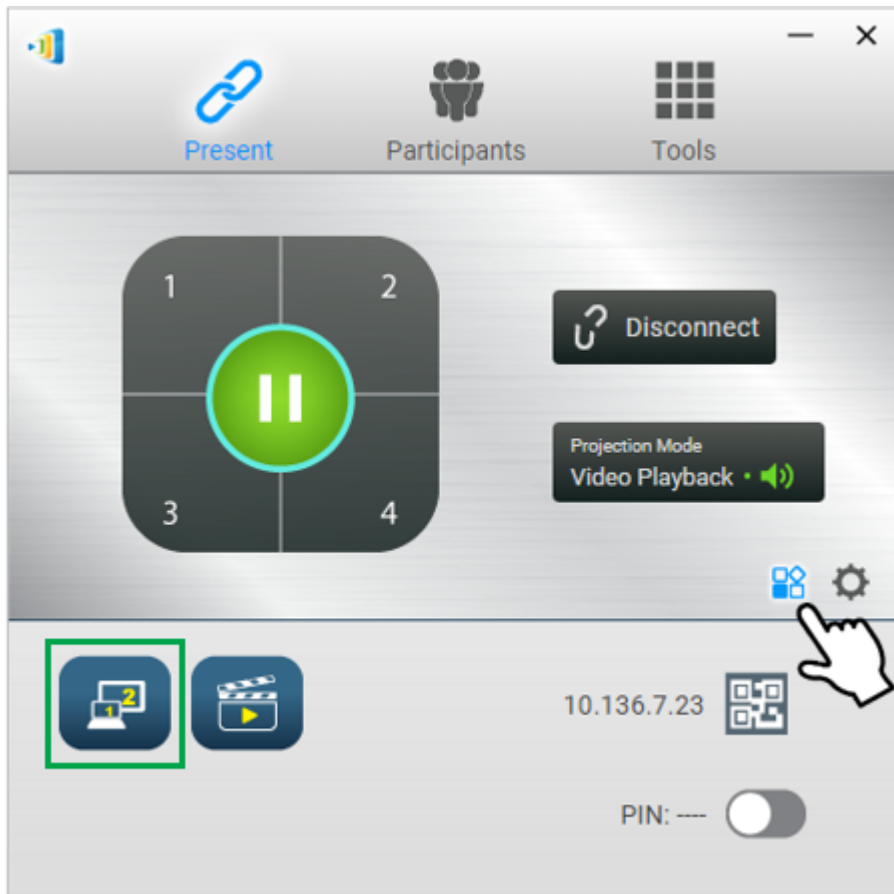

## Windows OS

- For Windows 10 computers, a Screen Extension driver is required.
- For Windows 7 and 8 computers, no addition driver is needed.

## Windows 10: Install Screen Extension driver

1. Download the Screen Extension driver for Windows 10
    - Executable version [Download](#)
    - MSI version [Download](#)
2. Please note that you will need Admin Privilege to install a driver. Launch the Screen Extension installer and follow the on-screen instructions to complete the process.
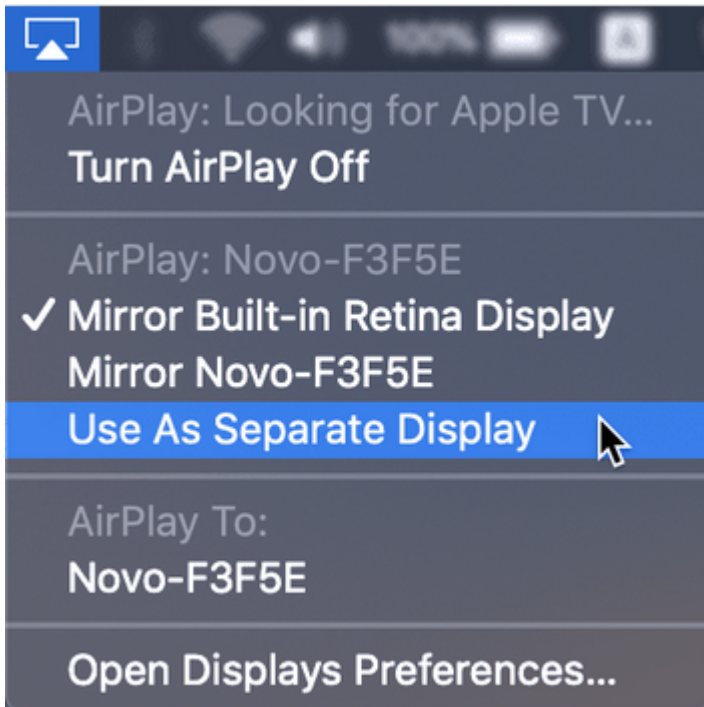

Joining a meeting, click **more** button > to enable **screen extension**.

# macOS: Use AirPlay

Screen extension for Mac computers is done via AirPlay.

When using AirPlay to do screen sharing on macOS, go to **AirPlay** menu > **AirPlay Display** > Select **Extend Desktop** to extend screen.

**Tips:** Pin the AirPlay icon on Mac's menu bar. Go to **System Preferences** > **Displays** > enable **Show mirroring options in the menu bar when available**.

Display   Color   Night Shift

Resolution:   ● Default for display
              ○ Scaled

Brightness:   ●

☑ Automatically adjust brightness

AirPlay Display:   Off

☐ Show mirroring options in the menu bar when available
