

What is Launcher

Two Launcher accessories are available to further simplify the process for you to connect to Novo devices, including NovoConnect, NovoDisplay, and NovoTouch.

Connecting a Launcher unit to your computer

Left: LauncherOne. Right: LauncherPlus.

(1) LauncherPlus

The LauncherPlus connects to any laptop, establishing a direct WiFi connection to any NovoConnect device, including NovoTouch. Intended for guests, LauncherPlus streamlines and secures the connection process, with zero impact on the existing network.

(2) LauncherOne

LauncherOne is specifically designed for companies with strict Data Loss Prevention (DLP) and IT security policies that lock USB ports for storage devices and do not allow corporate network-based wireless presentation solutions. LauncherOne includes a physical HID device and a portable application file. No administrator rights needed.
